

Broad agreement masks concentrated category-level divergence

34 category contributions · shared radial scale · bootstrap 95% intervals

Urban-need topics · All 19

Inner arcs: observed values; overlap 0–100%, JSD 0–0.16. Metric 95% CIs are provided in the accompanying data table.

Signs indicate the country with higher share; JSD contributions are non-negative. Full category names accompany the figure.
