SDG-specific relative supply positions and cross-country contrasts

Overall mismatch above · Country positions and signed differences below

Overall A^2 = sum of 12 squared M values; 2,000 project-family bootstrap resamples.

Gray bars: $\Delta M = M(\text{NSF}) - M(\text{NSFC})$; positive = higher NSF relative position.

12 SDGs · 24 country estimates · 12 contrasts. Relative positions do not measure absolute funding.
